Dear Larry

I understand that the Northeast Fire Dept. in Brown Summit N.C. has removed three underground gasoline tanks (one from each station) because they were leaking. These stations are in Guilford County . Station 33 is located at Hwy 150 E. at Spearman Rd. Station 32 is located on Jackson School Rd. I'm not sure where station 34 is located. I have property that joins the property that one of these stations are located. I also understand that permits, and test are required to remove these tanks. I have reason to believe this was not done. I watched as the tanks were removed from one station and there were no one there from the county , or the E.P.A. I have heard some of the officers of the fire dept. and board members state that they wanted to sneak the tanks out to prevent a costly clean up. I feel that if everybody else has to abide by rules, you would at least think that the county fire dept. should have to. Or do they just make the rules but not abide by them. I hope that I'm wrong but I want to make sure. Please make sure. Ill call you back in a few weeks to see what happened. I hope you understand that I wish to remain anonymous.

P.S. The tanks were removed sometime between July and September 1993
